SUMMARY

I'm a passionate Cloud & Full-Stack Engineering professional with hands-on experience designing AWS cloud solutions and developing modern web applications using the MERN stack. I've earned 19 industry-recognized certifications, proving my ability to master complex technologies and deliver high-impact results in cloud architecture, DevOps, and software development. Motivated by problem-solving and continuous learning, I thrive on building efficient, scalable, and user-focused solutions. My skills include AWS, React, Node.js, Angular, JavaScript, NoSQL, CI/CD fundamentals, Agile/Scrum and Generative AI.

EXPERIENCE

Senior Software Engineer   10/2023 - Present
Freelance

- Enhanced development workflows to utilize AI-powered coding assistants such as GitHub Copilot, leading to a 30% reduction in coding time.
- Engineered a suite of scalable, high-performance web applications that supported a 50% increase in user traffic without performance degradation.

Junior Software Engineer   03/2023 - 07/2024
Freelance

- Delivered three custom, full-stack web applications for small to medium-sized clients using React, Node.js, and Mongo DB.
- Managed the end-to-end Software Development Lifecycle (SDLC), successfully translating ambiguous client requirements into clear technical specifications and achieving 100% on-time project delivery.
- Optimized all deployed applications for mobile responsiveness and SEO, resulting in an average 25% increase in organic search visibility and client lead generation.
- Implemented RESTful APIs into client applications, ensuring data integrity and application stability under typical load.
